Basket Weaving – Divisions & Classes

Definitions

What is a basket? A basket is a functional container made of interwoven strips of pliable materials either natural or manmade.

Flat reed (includes Flat and Flat Oval): These baskets are predominately made from commercially processed reed from the Rattan vine. Oak handles, wood bases can be used, but the majority of the basket is flat or flat oval reed.

Hardwood Splint: Baskets made from white oak, black ash, hickory, maple, cedar and chestnut. The weaving materials are the raw wood that has been manually processed to obtain or make the weavers, staves and handles.

Florida Naturals: Baskets made from barks, vines (grape, kudzu, honeysuckle, etc), roots, grasses, inflorescence, philodendron, pine needles, roots, seed pods, etc. - anything grown and gathered in Florida. Must have at least 80% Florida natural fibers.

Wicker: Baskets made from round reed or natural willow.

Coiling: Baskets formed in a continuous spiral made of pine needles, grasses and cords.

Ribbed: Baskets are all woven (flat reed, round reed, naturals) around one round rim or two hoops and ribs made of reed spokes.

Mold Woven: Nantucket and Shaker baskets that are woven over a mold to create a uniform shape and size. Many have wood bottoms and staves are usually flat or flat oval reed, cane, ash or cedar.

Miniature: Any style of basket that is 4" or less

Mixed Media: Any combination of reed, splint, wire, waxed linen, gourds, leather, fabric, paper, vines, beads, etc. – it is an “anything goes” category.

If a **gourd** is part of your basket, at least 50% of the basket needs to be woven.

Wire or Textile: Any basket made from woven wire, waxed linen, waxed cotton, fabric, paper, rope, sisal, raffia, seagrass, leather, etc.

Kits and Patterns: These baskets are constructed from any materials in a purchased project kit or woven from any materials based on another person’s pattern or design. They would not be considered “original” work as the weaver is following instructions and using supplies or materials provided or selected by the basket pattern's designer. This includes projects completed in a workshop environment.

Art Basket: any type of an original constructed vessel that may be sculptural and not necessarily functional.

Art Cloth & Textile Surface Design – Divisions & Classes

Definitions

Surface Design encompasses the coloring, patterning, and structuring of fiber and fabric. This involves creative exploration of processes such as dyeing, painting, printing, stitching, embellishing, quilting, weaving, knitting, felting, and paper making.

Commercial Dyes consist of Fiber Reactive Dyes, Acid Dyes and Disperse Dyes

Natural Dyes consists of Cellulose and Protein Fibers only

Thickened dye is simply a dye solution which has been thickened into a paste with the help of something like sodium alginate. Thickened dye is absorbed into the fibers, and when the excess dye and print paste is washed away, the fabric is just as soft as before.

Discharge is the removal of dye from fabric.

Resists block the application of dye, paint, or discharge chemicals.

Shibori is a Japanese manual resist dyeing technique, which produces patterns on fabric.

Mixed Methods: We realize that Surface Design may combine a variety of techniques but when choosing a division and class, choose one that best describes the majority of the technique used to create your piece.

If you cannot choose a division and class that works for your work please choose **Mixed Methods**.

2024 Florida State Fair Shorn Fleece Entry Tag Form

OFFICE USE ONLY

Exhibitor # _____

Entry # _____

**PLEASE COMPLETE THIS FORM
AND BRING IT WITH EACH SHORN FLEECE ENTRY.**

Shorn Packaging Information

Fleece shall consist of the prime fiber only (defined as blanket area, which may include neck) and shall be displayed fully intact, should be skirted and displayed cut side out. The fleeces may be displayed in clear, unmarked plastic bags or in an 18" x 18" white box supplied by the show.

How to Fold and Package Your Fleece

Butcher roll is easy and presents your fleece in its best form. For Huacaya, have tip side up. For Suri, have cut side up. Fold each length side of the fleece towards the center (in thirds lengthwise). Gently roll fleece from one width end to the other like a jelly roll or sausage. Watch for second cuts. When you're done only the cut side for Huacaya and tip side for Suri will be exposed. Work a clean clear plastic bag around the fleece roll making sure the center (not an end) of the roll is exposed to the bag opening. Tilt bag upright and remove excess air. Tie knot in opening of bag down close to the fleece leaving an air hole for the fleece to breath. Complete a skirting bag tag with the alpaca's name, date of this year's shearing, date of last year's shearing, and weight on it. Put tag in bag through the air hole facing it to the outside so it's easily readable.

2 oz. sample packaging

The 2 oz. Llama or Alpaca Fleece class will follow the same rules as the Shorn Llama or Alpaca Fleece class except that entries in the 2 oz. Shorn Fleece class will be entered in gallon, plastic zip lock bags.
